DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 5, the term "it" is unclear. Appropriate correction is required. Claims 1-4 recites the limitation "the wings". There is insufficient antecedent basis for this limitation in the claim. Claim 2 recites the limitation "the car body". There is insufficient antecedent basis for this limitation in the claim. Claims 5 and 6 recites the limitation "the hollow" and "the holder". There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmidt (EP884214A1).

Schmidt discloses a safety airbag 5 located in the headrest 1 of a motor vehicle seat, by the fact that after its activation wings 6 extend on both sides of the headrest and forward, while between the wings there is a wedge-shaped area (the area surrounding the center) continuing the forward direction. The wings overlap a part of the front side of the headrest and they fill in the space between the side wall of the car

body and the neighboring headrests. The wings adjoin the front side of the seat in its upper part below the headrest. There is a connecting part 1 between the wings. A holder 9 of the headrest has a hollow bar 3, wherein the bar telescopes to adjust the headrest height.
